CONTENTS

H. B. Atabek: On an eigenvalue problem 188
R. R. Auelmann: Canonical equations for systems having polygenic forces 183
R. Bellman and J. M. Richardson: On some questions arising in the approximate solution of non-linear differential equations 333
R. Bellman: On asymptotic behavior of solutions of second-order differential equations 385
R. I. Bernstein (*see K. S. Miller*)
L. E. Blumenson (*see K. S. Miller*)
C. R. Calladine and D. C. Drucker: Nesting surfaces of constant energy dissipation in creep 79
Tse-Sun Chow and H. W. Milnes: Boundary contraction method for numerical solution of partial differential equations: convergence and boundary conditions 209
O. R. Cruzan: Translational addition theorems for spherical vector wave functions 33
E. Dahlberg: On radial flow of a conducting gas in crossed fields 353
S. C. R. Dennis: Step-by-step integration of ordinary differential equations . . . 359
F. L. Dimaggio: Longitudinal vibration of a prolate ellipsoid 182
D. C. Drucker (*see C. R. Calladine*)
I. Frank: An application of the Euler-Maclaurin sum formula to operational mathematics 91
W. F. Freiberger: An approximate method in signal detection 373
M. E. Gurtin: A note on the principle of minimum potential energy for linear anisotropic elastic solids 379
M. C. Gutzwiller: Note on Green's function in anisotropic elasticity 249
W. R. Haseltine: An extension of Poincaré's continuity theorem 185
R. Herman (*see G. Weiss*)
H. Hochstadt: A class of stability criteria for Hill's equation 93
N. J. Hoff (*see W. Nachbar*)
F. C. Karal and S. N. Karp: Diffraction of a plane wave by a right angled wedge which sustains surface waves on one face 97
S. N. Karp (*see F. C. Karal*)
H. B. Keller, J. B. Keller and E. L. Reiss: Buckled states of circular plates 55
J. B. Keller (*see H. B. Keller*)
G. Kleinstein: An approximate solution for the axisymmetric jet of a laminar compressible fluid 49
G. Kron: Camouflaging electrical 1-networks as graphs 161
W. E. Langlois: Isothermal squeeze films 131
J. A. Lewis: The small-field theory of the Joule and Wiedemann effects 13
C. A. Ludeke and R. R. Weber: An optimization of the phase-plane-delta method for the solution of non-linear differential equations 67
O. L. Mangasarian: Duality in nonlinear programming 300
Z. A. Melzak: Scattering from random linear arrays with closest approach . . . 151
J. S. Miles: Stability of forced oscillations of a spherical pendulum 21
K. S. Miller, R. I. Bernstein, and L. E. Blumenson: Generalized Rayleigh processes 394
H. W. Milnes (*see Tse-Sun Chow*)
R. D. Mindlin (*see H. F. Tiersten*)

W. L. Miranker: Singular perturbation analyses of the differential equations of a tunnel diode circuit 279
L. I. Mishoe: Fourier series and eigenfunction expansions associated with a non-self-adjoint differential equation 175
W. Nachbar and N. J. Hoff: The buckling of a free edge of an axially-compressed circular cylindrical shell 267
I. U. Ojalvo: An extension of 'separation-of-variables' for time-dependent excitations 390
T. A. Oliphant: An extrapolation procedure for solving linear systems 257
P. Perzyna: The constitutive equations for rate sensitive plastic materials 321
C. R. Putnam: On the spectra of unitary half-scattering operators 86
C. R. Putnam: The spectra of irrotational flows 388
E. L. Reiss (*see H. B. Keller*)
E. Reissner and H. J. Weinitschke: Finite pure bending of circular cylindrical tubes 305
J. M. Richardson (*see R. Bellman*)
G. F. Smith: On the yield condition for anisotropic materials 241
M. M. Stanisic: On a theory for unsteady motion of rectangular wing in supersonic flow 231
M. Tideman: Remarks on the inertia instability of a rolling missile 1
H. F. Tiersten and R. D. Mindlin: Forced vibrations of piezoelectric crystal plates 107
R. R. Weber (*see C. A. Ludeke*)
H. J. Weinitschke (*see E. Reissner*)
G. Weiss and R. Herman: Statistical properties of low density traffic 121
D. V. Widder: Series expansions in terms of the temperature functions of Poritsky and Powell 41
Tai Te Wu and Tai Tsun Wu: Iterative solutions of Wiener-Hopf integral equations 341
Tai Tsun Wu (*see Tai Te Wu*)
E. E. Zajac: Bounds on the decay rate of damped linear systems 383
A. H. Zemanian: An upper bound on non-negative transient responses 89
